

WeekDaze

Elevator pitch

Concept

Description

- WeekDaze is an all-in-one tracker used during your next job search.

Motivation

- The most difficult part of searching for a job is remembering all the details for each job you have applied -- when did you apply, next steps, important information, etc.

User Story

- Given I am searching for a job, I can enter in multiple jobs I have applied to and the details associated with each.

Process

Technologies used

Bootstrap, Express, BCrypt, Express-Session, Handlebars, Dotenv, Sequelize, MySQL, Chart.js

Caroline

API Routes, Dashboard Functionality

Jackie

Dashboard and Specific Job Page Framework, Specific Job Page Functionality

Payton

Bootstrap/CSS, Handlebars, Login/Logout

Rachel

Chart.js, Model setup

Process(cont.)

Challenges

- New Technologies -- Chart.js
- Handlebars Logic

Successes

- Our Chart.js shows beneficial information
- Our group worked well together

Demo

Directions for Future Development

- Be able to delete jobs & statuses
- Have the notes on the specific job pre-populated so no notes are unintentionally deleted
- Create charts for salaries, employee ratings, user interest in job, benefits, etc.
